	The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

Page 2

## Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- A. Elect ion is required of the additional component in the compound comprising a local anesthetic recited in claims 26-35. For example, applicant may elect a potassium channel opener (recited in claims 26-29), an NO donor (recited in claims 26-29), a specific NO donor, such as one that is nitric-oxide synthase independent (recited in claim 34), an anti-adrenergic compound (recited in claims 26-29), a specific anti-adrenergic compound, such as metoprolol (recited in claim 30), an opioid (recited in claims 26-29), a specific opioid, such as endorphins or a delta opiod receptor agonist (recited in claim 31 and 32), a calcium agonist (recited in claims 26-29), a specific calcium agonist, such as amlodipine (recited in claim 33), a sodium-hydrogen exchange inhibitor (recited in claims 26-29), or a specific sodium-hydrogen exchange inhibitor, such as amiloride (recited in claim 35).
- B. Elect ion is required of the various types of cells and organs recited in claim 36. For example, applicant may elect a myocyte, an endothelial cell, or a heart.
- C. Election is required of the various agents recited in claim 37. For example, applicant may elect low molecular weight heparin, ibuprofen, or naproxen.

Application/Control Number: 10/539,222

Art Unit: 1651

D. Election is required of the various agents recited in claim 38. For example, applicant may elect an antioxidant, ionic magnesium, or an impermeant.

Page 3

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

- 2. The claims are deemed to correspond to the species as set forth above.

  The following claim(s) are generic: No claims are generic for species group A. Claim 27 is generic for species groups B and D. Claim 29 is generic for species group C.
- 3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The technical feature common to all species is a method of administering a composition comprising a local anesthetic and another component to a cell. However, Del Nido et al. (US 5,407,793) teach a method for the administration of a composition comprising a local anesthetic and another component (e.g. adenosine) to a cell (abstract, col. 8-9, examples 1 and 2). Therefore, the species set forth above to not share a special technical feature that makes a contribution over the prior art.
- 4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

Art Unit: 1651

requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sheridan R. MacAuley whose telephone number is (571) 270-3056. The examiner can normally be reached on Mon-Thurs, 7:30AM-5:00PM EST, alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Wityshyn can be reached on (571) 272-0926. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
